Lafayette Choir Equipment Needs

Over the years the Lafayette Chorus Boosters has invested significantly in the Lafayette choral program by providing classroom and performance equipment in addition to our regular commitment of operating funds. The continued investment is necessary to maintain and grow a quality program. Past contributions include special posture chairs for the rehearsal room, seating rehearsal risers, rolling library shelving, instructional electronics, performance risers and acoustical shell. Any contribution that helps us reach our goals is greatly appreciated. Contact the Lafayette Chorus Boosters to make a contribution.

Wenger Legacy Acoustical Shell (6 units) – \$11,200

Acoustical shells are vertical panels placed behind a performing group to focus and reflect sound back to the audience. They improve the acoustic of a room and allows performers and audience to hear with greater clarity. Acoustical shell are vitally important on a multi-purpose stage where theater curtains and back stage voids can soak up sound. This will replace our aging second-hand set that is currently over thirty years old.

Hybrid Piano for classroom use – \$5,000

A hybrid piano is the latest in piano technology. It combines resonating properties of a piano's wooden cabinet and soundboard with electronic keyboard sound transducer. A hybrid piano eliminates tuning costs and repair and adjustment of delicate piano action.

Wenger 4 step Signature Riser – \$2000

An additional four-step standing performance riser will complete our set.

Seated riser safety railing (8 units) – \$2,800

The rehearsal risers need safety railings

Total: \$21,000
